

# POWERGRIP & HYDRAULIC SWIVEL RETROFITS

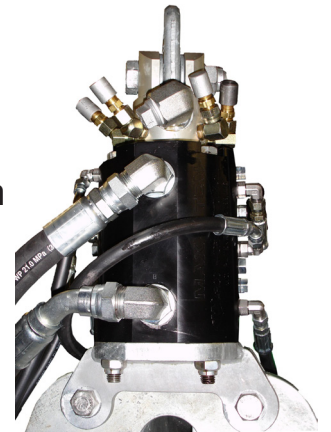

## Powergrips:

MARCO Powergrips are available as an addition to most models of MARCO Powerblocks and have been retrofitted on a number of different brands and sizes of Powerblocks.

The yoke mounted Powergrip helps keep the net square when hauling, increasing traction and control of the net in rough weather.

## Hydraulic Swivel:

Rotate your Powerblock 360 degrees. The load bearing hydraulic swivel option allows the powerblock to easily haul port or starboard without binding the hydraulic hoses.

| Model                                      | Weight LBS | Additional Height Inches |
|--|------------|--------------------------|
| Addition of MARCO B9926 Powergrip          | 160        | N/A                      |
| Addition of MARCO B9926 Powergrip & Swivel | 275        | 8                        |
| Addition of MARCO B9928 Powergrip          | 190        | 10                       |
| Addition of MARCO B9928 Powergrip & Swivel | 280        | 29                       |
